

DC-3GHz / 6GHz 10W N Female RF Dummy Load

RF Dummy load are used in a wide variety of measurement systems. Any port of a multi-port microwave device that is not involved in the measurement should be terminated in its characteristic impedance in order to ensure an accurate measurement. Terminations are also used in devices such as directional couplers and isolators.

Technical Data Sheet

Frequency Range	DC - 3GHz / 6GHz
Connectors	N Female
Body Material and Plating	Black Anodized Aluminum Heatsink
VSWR	3G: ≤ 1.2 6G: ≤ 1.25
Power	10W
Impedance	50 Ω
Temperature Range	-55°C ~ +125°C
Dimensions	$\varnothing 30 \times 60$ mm
Weight	71g

Tolerance: $\pm 2\%$
